This appendix includes:

- **Appendix Figure S1**
- **Appendix Table S1**

Appendix Figure

Appendix Figure S1 Box plots of the different components of the final conservation score in situ of the families in different strategies (orange represents the loose method, while red represents the strict method). Abbreviations as in Figure 2. (a) and (b) were the box plots of FCSin of families in different strategies. (c) and (d) were the box plots of SRSin of families in different strategies. (e) and (f) were the box plots of GRSin of

families in different strategies. (g) and (h) were the box plots of ERSin of families in different strategies.

Appendix Table

Appendix Table S1 The list of Chinese freshwater fish, with their taxonomic status, extinction status, the final conservation score in situ and its components scores using different distribution strategies. Abbreviations: EX, Extinct; RE, Regional Extinct; CR, Critically Endangered; EN, Endangered; VU, Vulnerable; NT, Near Threatened; LC, Least Concern; DD, Data Deficient; FCSin, the final conservation score in situ; SRSin, the sampling representativeness score in situ; GRSin, the geographical representativeness score in situ; ERSin, the ecological representativeness score in situ.

Binomial	Order	Family	Genus	Status	Loose method					Strict method
